

SPHINGOLIPIDS COB

Natural bio-lipidic concentrate

INCI NAME:

OCTYLDODECANOL, PHOSPHOLIPIDS, CHOLESTEROL, GLYCOSPHINGOLIPIDS, TOCOPHERYL ACETATE.

DOSE OF USE:

2-5 %

SOLUBILITY:

LIPO-SOLUBLE. HYDRODISPERSIBLE

PRESERVATIVE:

JAPAN, EEC AND USA APPROVED

COSMETIC USE:

- Stressed, rough, scaly and dry skin care creams
- Skin suffering from chemical or environmental damages
- Treatments for skins lacking protection
- Solar care products.
- Lip care products and treatment make-ups
- Products for damaged, dry and prematurely aged hair

DESCRIPTION:

SPHINGOLIPIDS-COB is a lipid active ingredient with homologous composition and similar functions to the epidermal and hair lipids.

SPHINGOLIPIDS-COB on skin strengthens hydro-retention power, by enriching the inter-corneocitary cement and the stratum corneum lipid membrane, improving its biomechanical properties.

Determines a **MICRO-FILM** activity which reinforces the homologous lipidic complexes, as well as the epidermal and sebaceous lipids. This makes it perfect for **lip care**.

Lips are particularly sensitive, being covered by a thin and little keratinized epithelium. They need special protection and maintenance of the quality of their lubricating elements.

SPHINGOLIPIDS-COB maintains lips turgidity and optimal hydration status, increasing the quality of its own hydro-retention and permanent lubrication.

PROPERTIES:

- ✓ Reinforces the hydro-retentive power of the **STRATUM CORNEUM**, by enriching the intercorneocyte and membrane lipid cement of the Stratum Corneum.
- ✓ Reinforces the epidermal **BARRIER PROPERTY** by lipo-protection and lipo-structuration of the superficial epidermal layers, by specific biological lipids.
- ✓ Reinforces **COHESION** of the cells and epidermal layers and consequently improves suppleness, softness, and epicutaneous comfort, decreasing the rough, scaly appearance resulting from various environmental factors.
- ✓ **FILM-FORMING** effect on the labial membrane, providing a feeling of comfort and softness, photo-protective and anti-free radicals.
- ✓ **CONDITIONER** for hair and scalp, seals the surface of the hair with a protective, isolating and substantive biological film that reinforces the cohesion of the hair's scales, improving shine and biomechanical properties.
