

# PORE REDUCTYL NT

Pore refiner, astringent and moisturizer natural extract

## INCI NAME:

Propanediol, Aqua, Fomes Officinalis Extract.

## DOSE OF USE:

2 % - 5 %

## SOLUBILITY:

Hydrosoluble

## PRESERVATIVE:

Preservative free

## COSMETIC USE:

- › Natural astringent and cleanser
- › Pore reducer
- › Matifying effect on skin
- › Oily skin care and hygiene products, with or without acneic tendency

## DESCRIPTION:

**PORE REDUCTYL NT** is a purified, concentrated active, extracted from the pulp of *Fomes officinalis*, a mushroom that grows on the trunk of *Alerces*.

The excess of sebum, stress, smoking, environmental pollution, all contribute to the expansion and deformation of the skin pores.

**PORE REDUCTYL NT** is a pore refiner for oily and mixed skins. It is a natural astringent containing **agaric acid**, that overcomes all excessive secretion, smoothing, tightening and moisturizing the skin.

This correction focuses on improving the appearance of the skin, the pores are reduced in size and number and are less visible.

**Clinical in-vivo efficacy test** on 15 volunteers, showed **3% PORE REDUCTYL NT** immediate effect on **reducing the number of pores** at T=15' and T=1h.

## PROPERTIES:

### ✓ Cutaneous astringency:

This effect immediately perceptible, as a local sensation of cutaneous tightening can produce an improvement of the skin's tone, or firmness.

As we age, our skin's elasticity decreases. Cellular activity slows in the epidermal basal layer, the skin's defense against environmental attack is compromised, cell turnover and vitality decrease and the skin loses its firmness.

The fight against loss of skin tone is preferably based on prevention, by helping the skin to defend itself against external attack.

**PORE REDUCTYL NT** produces an immediate tightening effect.

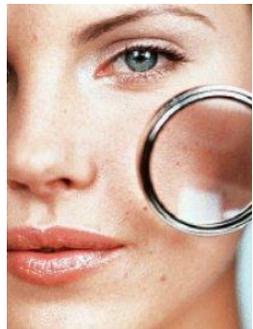

### ✓ Pore tightening:

In addition to its perceptible astringency, **PORE REDUCTYL NT** tightens pores, which is particularly useful for oily skin of the forehead and nose.

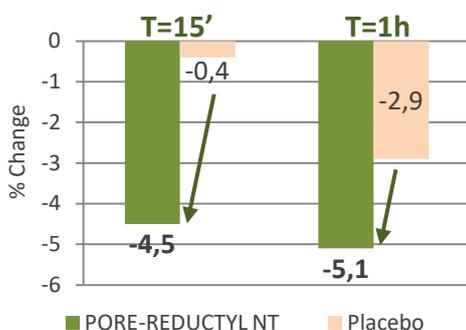

Oily skin is excessively shiny and may have large, dilated pores. The cosmetic interest in **PORE REDUCTYL NT** is to minimize the visible appearance of skin suffering from excess sebum secretion.

### ✓ Moisturizing effect:

One of the advantages of **PORE REDUCTYL NT** is that its astringency and pore tightening effect do not dry the skin; on the contrary, it moisturizes the stratum corneum, making the skin supple.

Pore number reduction
